Sourcefire Education Recognized in 2009 Magic Quadrant for Network IPS Appliances

In the newest release of the Magic Quadrant for Network IPS Appliances, the Sourcefire Education team was recognized as a "strength" and given "strong marks."

Sourcefire team continues to reinforce this success programs designed to keep your staff current and confident that your organization has the knowledge and skills required to deploy and maintain a secure environment.

New Infoblox PortIQ

Infoblox Inc. announced availability of the new Infoblox PortIQ appliance, which provides visibility into port usage—essential for network capacity planning, security investigations, and ease of troubleshooting, saving operational costs.

The Infoblox Port IQ appliance can be operated as a stand-alone system used to inventory routers and switches, gather port utilization data and provide detailed, easily customized reports on ports in use, activity level and other data. The PortIQ appliance make it easy to find unused capacity, spot trends, reserve ports for specific pro-

Discover Why Companies Replaced IBM-ISS with Sourcefire

Sourcefire interviewed three of its customers in different vertical industries to explore the reasons why their company replaced ISS with Sourcefire and to find out how the 3D system is working in their network environment. Below is one of the example:

jects, detect unauthorized network use, and determine which devices will be impacted by a planned switch upgrade or outage.

For further information about Infoblox products, please visit <http://www.infoblox.com/products/>.

Interview #1: Paul B, European Energy Utility—

"... over three years, it would cost a third less to buy Sourcefire instead of renewing with ISS. Sourcefire mad financial sense, and from a technical perspective it was a better product. It was fairly easy choice, really." Paul B. Information Security Analyst, European Energy Utility.
